

# Environmental Policy

Our commitment at SNS is to provide a high-quality service whilst ensuring a safe and healthy workplace for our employees and minimising our impact on the environment.

We will comply with all relevant environmental legislation, and strive to employ pollution prevention and best environmental practices in all our activities.

Our objective is to promote sustainability and enhance environmental awareness throughout our company.

Our aims

- Incorporate environmental concerns and impacts into our decision making and operations
- Minimise waste generation and maximise reuse and recycling
- Reduce energy and water consumption in our facilities and processes to conserve resources
- Prioritise the supply of products and services that have minimal environmental impact
- Prioritise collaboration with supply companies that are committed to sustainable practices
- Train and educate our employees on environmental issues relevant to their work.
- Promote environmental awareness among our employees and encourage environmentally responsible practices
- Communicate our environmental commitment to clients, customers, and the public, and encourage their support
- Ensure compliance with relevant environmental legislation and sustainability commitments
- Assess and analyse our carbon footprint in collaboration with other initiatives addressing climate change mitigation and adaptation
- Support and invest in technologies that offer alternatives to non-sustainable business travel

This Policy will be reviewed annually or when there is any change to the company processes or structure, or when circumstances require.

Michael Brown,  
Managing Director
